CAREER OBJECTIVE

I am a frontend developer who loves to build modern, responsive, and user-friendly web interfaces. I enjoy improving my skills in JavaScript, React, and UI/UX to create meaningful digital experiences, and I am eager to grow as I contribute to innovative and scalable projects.

Skills

Front-End:HTML,CSS,Tailwind,JavaScript,React.js,Next.js
Backend: Node.js, Express,Mongodb,Firebase
Tools:VS Code, Git,GitHub,Figma,Netlify,Vercel

Project

1. KrishiLink — Agricultural Crop Marketplace   Client Repo | Server Repo | Live Link

A simple and efficient platform that connects farmers with essential services and resources. Designed for easy access and smooth interaction to support better agricultural management.
Technologies: React.js, Tailwind, Node.js, Express.js, MongoDB, Jwt, Cors, Firebase
Features:

- Farmers can add, update, or delete crop listings easily
- Buyers can browse products by category and view details
- Users can place orders securely through the platform
- Buyers can give feedback and rate products to help others

1. LMS Course Management   Repo Link | Live Link

A modern and efficient platform designed to manage courses, instructors, and learners effortlessly. It provides a clean interface with smooth navigation for a seamless user experience.
Technologies: Next.js, Tailwind, Node.js , Express.js, Mogodb, Cors, Clerk
Features:

- Developed a full-stack web application using Next.js App Router with modern layouts, routing, and responsive UI.
- Course creation, update, and management system and dynamic course listing with category-based filtering.
- A dynamic item list has been created with search facilities, responsive grid layout, and uniform cards.
